

**A.D. Compound** boasts thirty years' experience working with plastic materials, specialising in the production of polypropylene compounds.

The company was one of the first to gain experience in the compounds sector, which has gradually become its core business.

The company later introduced new product types and has now achieved a sufficient degree of flexibility in compound formulas and colours to satisfy all its customers' requests.

#### **FIELDS of APPLICATION:**

A.D. Compound's current range includes homopolymer and copolymer polypropylene based products, with the addition of various mineral fillers such as talc, calcium carbonate, barium sulphate, fibreglasses, self-extinguishing material, EPDM; available with antistatic and anti-UV agents.

- Interior decoration - Garden furniture
- Automotive - motorcycles
- Construction
- Home appliances
